ST. CLAIR COUNTY BUILDING PERMITS

EFFECTIVE 01-01-2024

Please be advised that on June 9, 2023, Public Act 103-0053 regarding Electrical Vehicle Charging Stations was signed into law and became effective January 1, 2024. The Public Act created the Electrical Vehicle Charging Act (765 ILCS 1085/1, *et seq.*).

The new law requires certain electrical vehicle charging station requirements for new single-family homes and multi-family residential buildings.

Please consult this new law as all new single-family homes and certain new multiple family buildings that are constructed after January 1, 2024, are to have certain electrical vehicle charging infrastructure/capabilities installed.

Thank you,

**Anne Markezich, Director
St. Clair County Building & Zoning**
